

## New Hampshire ER alternatives: walk-in doctor's offices, urgent care facilities, and retail health clinics

## Quick guide to locations and services

You can take care of "minor" injuries or illnesses such as small cuts, earaches, sprains, a cough, a cold or the flu without going to the emergency room (ER) — and save time and money. When you can't see your doctor right away, or if your doctor's office is closed, you can choose from a walk-in doctor's office, an urgent care facility or a retail health clinic.\* Most are open weeknights and weekends.

This quick guide shows you the location of these offices, facilities, and clinics; and an "X" in the column shows which type of services they offer. These choices have different services and copays, so please call and ask before you go.

## Choose a care option that could save you time and money

- Walk-in doctor's office You don't have to be a current patient or have an appointment. This type of office handles mostly routine care and common family illnesses.
- Urgent care facility These facilities are often part of a hospital and are staffed by doctors who treat health problems that should be looked at right away but aren't as serious as emergencies.

They can often do X-rays, lab tests and stitches.

 Retail health clinic — It's staffed by health care experts who give basic health care services to "walk-in" patients. Most often it's found in a major pharmacy or retail store.

Remember, you have choices. If it's not an emergency, you can also call our 24/7 NurseLine. The nurse on the phone can help you decide what to do next. The phone number for 24/7 NurseLine is on your ID card (or you can contact Customer Service for assistance).

Please note, this list is likely to change. You can also find the most up-to-date listings using our *Find a Doctor* tool on anthem.com.

Anthem Blue Cross and Blue Shield is the trade name of Anthem Health Plans of New Hampshire, Inc. Anthem Health Plans of New Hampshire, Inc. \*\*Some locations only offer certain types of vaccinations. To find out which ones are available at a location near you, please contact the facility directly.

## When to use the ER

Always call 911 or go to the ER if you think you could put your health at serious risk by delaying care.
