

**Owners and Service Managers: Need Auto Techs?  
Automotive Technology College Courses at Half Price!  
Classes begin January 22! Do not delay.**

NHADA has obtained a job training grant from the NH Dept. of Business and Economic Affairs to train existing employees in Automotive Technology at NH community colleges. The attendees receive college credits, and NHADA members are reimbursed half of the tuition through the grant.

NHADA members, you can provide automotive technology college courses to your entry-level employees through this job training grant. The employees will receive college credits at NH community colleges, and NHADA members will be reimbursed half of the tuition. So, take a look at your employees to see who might be a good candidate. Your future tech might just be working in your wash bay!

The employer and not the employee must pay for tuition, books and fees, which are also eligible for one-half reimbursement. It is up to the member company to submit copies of tuition and book receipts to NHADA to include in the reimbursement request. If the employee picks up and pays for a textbook, please show clearly your reimbursement to the student. We will submit all to the NH Job Training Grant for reimbursement.

Please contact the school personnel listed under each college for additional course information and to register. Contact Jean Conlon at [jconlon@nhada.com](mailto:jconlon@nhada.com) or 800-852-3372 with questions regarding the job training grant.

**Classes Run from January 22 to May 10**
